Carolinas
and Beyond
Since 1993*

Come pay a visit to the mountains and see our selection of stone...you'll be glad you did.

STONE SIZE DESCRIPTIONS

THIN 1/4" to 2" thickness with a face width of 6"-24". Average coverage is approximately 100 square feet per ton.
Ideal for Veneer or Flat Stacking.

THICK 3"-6" thickness with a face width of 4" to 18". Average coverage is approximately 40 square feet per ton.
Ideal for Walls Flowerbeds & Hearths.

FLAGSTONE 1 1/2"-2 1/2" thickness with a face width of 12"-36". Average coverage is approximately 100 square feet per ton.
Ideal for Patios, Walkways & Pool Decks.

NOTE All size and color depictions are approximate and not uniform from one load to the next. In most cases it is important to order enough materials to complete the job from one load, all at once, in order to ensure desired size, color and consistency.
Not all rock types are available in all sizes.
